Use NABERS to improve your hotel's energy and water efficiency

WHY NABERS?

At NABERS, we know that environmentally friendly buildings are better for the bottom line, better for our clientele and employees, and better for the planet.

NABERS (which stands for the National Australian Built Environment Rating System) provides simple, reliable and comparable sustainability measurement you can trust across building sectors like hotels, shopping centres, apartments, offices, data centres and more.

Over the last 20 years we have proven that “What gets measured gets managed.”

Our customers have saved an average of 30-40% on their energy over 10 years.

Our rating system has driven financial growth and solid returns in portfolios across building sectors. It has direct-ed corporate procurement by clearly demonstrating their operational performance and sustainability achievements.

A NABERS rating helps you to accurately measure, understand and communicate the environmental performance of your building, while identifying areas for cost savings and future improvements.

ABOUT NABERS FOR HOTELS

NABERS ratings for hotels quantify your hotel building’s energy and water performance. We give your building a rating from one to six stars, based on the energy and water efficiency of common areas, guest rooms, back of house facilities and on-site amenities.

Your NABERS rating can then be used to identify areas for cost savings and building improvements, as well as to promote the environmental credentials of your hotel, helping you to attract greater investment and increase guest loyalty and engagement. Ratings can be promoted either including or excluding green power.

WHAT HOTELS CAN BE RATED?

All hotels can be rated under NABERS Hotel ratings. The benchmarks for Energy and Water ratings were designed to encompass a wide range of hotels with typical level of servicing and facilities, including budget through to luxury accommodation based on industry standards.

NABERS STAR RATING GUIDE

★ ★ ★ ★ ★ ★	MAKING A START
★ ★ ★ ★ ★ ★	OPPORTUNITIES FOR UPGRADES
★ ★ ★ ★ ★ ★	MARKET STANDARD
★ ★ ★ ★ ★ ★	HIGH PERFORMANCE
★ ★ ★ ★ ★ ★	SUPERIOR PERFORMANCE
★ ★ ★ ★ ★ ★	MARKET LEADER

If a hotel contains atypical levels of servicing, it might not provide a fair basis for comparing it to others, but it can still be used for self-comparison and tracking performance over time.

YOUR SUSTAINABILITY STRATEGY

COMPARE

NABERS ratings form the basis of any hotel service's rigorous sustainability strategy. They provide a fair benchmark for your hotel building's energy and water efficiency, enabling comparison across your portfolio, and across the industry. With annual ratings, you can see how improvement activities in your hotels enhance your rating.

VALIDATE AND COMMUNICATE

NABERS provides cost-effective, high-trust and independent validation of your sustainability data, ensuring you can be confident in reporting it publicly and communicating it simply.

TRACK AND IMPROVE

NABERS star ratings are your essential framework for annual reporting and sustainability strategies. With annual ratings, you can see how effective activities at your hotel deliver performance improvements and reduced energy and emissions.

COMPETITIVE EDGE

Enjoy a competitive advantage with corporate clients who include NABERS ratings in their accommodation and conference procurement policies. With NABERS ratings, you'll gain a head start to take advantage of corporate and government procurement policy. You'll be less wasteful of key resources, while improving your building's resilience to unexpected impacts of climate change.

HOW WE DELIVER FAIR COMPARISON

We rate standard, suite, boutique, conference, gaming/casino, ski and spa hotels, and factor in shared space usage in mixed-use buildings into your rating. When calculating your rating we account for all onsite services and amenities that are unique to your building, including:

- Carparks
- Laundries
- Function and conference rooms
- Spas and saunas
- Indoor/outdoor swimming pools
- Restaurants and cafés
- Gyms

We adjust for differences between hotel quality, so it's always a fair comparison. Additionally, even if your occupancy rates fluctuate throughout the year, our algorithm uses an average over the year, so you're always being assessed fairly.
